ICATT Apprenticeship Program Welcomes Richard J. Daley College to Their Network

As the twelfth college to join the ICATT Network, Richard J. Daley College enhances the ability to offer apprenticeships to companies in south and southwest Chicago

CHICAGO -- June 3, 2019 -- Industry Consortium for Advanced Technical Training (ICATT), the leading apprenticeship program in the Midwest for high-tech manufacturers and companies with complex technologies or logistics, expands its college base to twelve colleges and welcomes Richard J. Daley College to their network.

Richard J. Daley College, located in Chicago, enhances the opportunity to offer apprenticeships at local high-tech manufacturing companies in fields such as mechatronics and CNC machining. By joining the ICATT Apprenticeship Program, Chicago high-tech manufacturing companies will be able to develop a workforce development strategy that provides a pipeline of skilled talent over time.

“Richard J. Daley College and City Colleges of Chicago are excited to now be a part of the ICATT network in partnership with the German American Chamber of Commerce and the Illinois Manufacturers Association,” said Daley Dean, David Girzades. “Manufacturers we speak with frequently express their urgent need for a trained workforce and this partnership will help Chicago manufacturers remain an economic engine for this region.”

“We are pleased to expand our network of community colleges to Richard J. Daley College,” says Mario Kratsch, Head of the ICATT Apprenticeship Program. “The expansion of the program now provides companies and apprentices on the south and southwest regions of Chicago a closer alternative for the classroom portion of the apprenticeship. We are proud to have them part of the ICATT Apprenticeship Program.”

About ICATT

The Industry Consortium for Advanced Technical Training (ICATT) helps high-tech manufacturers and companies with complex technologies or logistics develop a pipeline of skilled talent through its globally

recognized apprenticeship program. The ICATT Apprenticeship Program partners with companies and community colleges to develop custom company training plans using industry-defined competencies and is benchmarked on the globally recognized German Dual Education System. ICATT was established by the German American Chamber of Commerce of the Midwest and is supported by grants from the U.S. Department of Labor and The Joyce Foundation.
